Trains Are Late—Through eastern Wyoming and Nebraska, the storming has reignited with undisturbed severity and passenger trains are from two or three hours to ten and twelve hours late. The trouble has been largely east of Hawling where the snow is badly drifted and pretty well packed in many of the cuts. Snow plows and shovellers are out in force, and every effort possible is being made to keep traffic moving. The westbound Overland Limited arrived three hours late this afternoon; the fast mail, due from the east at 1:05 p. m., is reported ten hours late and will probably not arrive until midnight; passenger train No. 3, due at 5:45 a. m., will arrive this evening some time, and the Los Angeles limited, due at 6:35 p. m., is reported seven hours late.

Gymnasium—Steps are being taken by a number of young men toward the establishing of a gymnasium in Ogden. The movement has advanced so far that committees are now engaged in looking for suitable headquarters and prospective members. This will be followed by the organization and incorporation of the association. It is stated that until a permanent home is found for the association, the gymnasium will probably be fitted up in the gymnasium of the Weber academy. It is the purpose of the promoters, among whom are members of the Union and Southern Pacific Overland limited, to organize a gymnasium which will be permanent.

PLAIN CITY PEOPLE DENOUNCE EXAMINER

Send Word That They Are Satisfied With the Plain City Railway; Satisfied With the Price; Satisfied With All Conditions to Date—Real Committee Instructed to Correct the Misrepresentations of the Muck-rakers.

Lyman Skeen, chairman of the railway committee of Plain City, called at the Standard office Saturday evening and stated that, on behalf of the committee and on behalf of the people of Plain City, he desired this paper to announce that the people of Plain City have no complaint to make against the railroad runnibor was Five Points to Plain City; that, had they any complaints to make, they would make them to the management of the railway company first, and only after being refused a hearing, would they rush into a newspaper controversy. Mr. Skeen further stated that the contract which the people of Plain City had with the railroad company was entirely satisfactory, and that the railway company was living up to its agreement; that the people are entirely satisfied with conditions up to date.

Mr. Skeen further stated that the price the railway company charged for beets per ton from Plain City to the Short Line Railway company at Harriaville is 25 cents, of which 15 cents per ton was collected by the Plain City line to be paid to the committee who did the grading, and that the Ogden Rapid Transit company received only 10 cents per ton for hauling the beets from Plain City to the Harriaville junction of the Short Line, which is the same price the people of North Ogden pay.

thing. The court explained to Mr. Loewenstein that the lowest fine that could be imposed was \$10 and that, in the circumstances, the fine would be assessed at the minimum. It was also suggested to the defendant that he might find redress at the hands of the mayor by way of a pardon. Mr. Loewenstein paid his fine and then visited the mayor.

the higher altitudes there has been a heavy fall of snow and it is still coming down. The Road Transit people have done excellent work, succeeding in keeping their tracks clear. Traffic has not been retarded by virtue of the heavy storm. The electric brush was run over all the lines of the city Sunday and this morning, and even the Canyon road has been kept open. Some difficulty was encountered this morning in keeping the Plain City road open, because of the prevailing winds that piled the snow in drifts along the track.

County Commissioners—The commissioners of Weber county met in regular session at the court house this morning and a full board was present. No new matters were taken up and the board devoted the morning hours to the consideration of routine business.

The temperature is so high that the ice dealers are wearing rather long faces. They say that it is not looking making weather, and that, so far, but the ice has been formed on any of the ponds. The excessive fall of snow, too, is an impediment to the formation of good ice on the ponds. It mixes with the ice in such way as to cause the ice to be porous. The ice already formed is not thick enough to permit putting a team and scraper upon it to remove the snow. On Saturday the Smith pond had to be cleared of its ice because of the mixture of snow and dirt. The ice was broken into small pieces and carried away by the strong current of water. The ice on this pond was only about a ninth and a half thick when it was released.

Improving in Health—W. R. Day, the insane man who has been cared for by Sheriff Wilson at the county jail since Tuesday, is improving under medical treatment and will soon be in normal condition again.

The man who buys the toys for Wright's Basement struck some right luck today and says he will pass the good fortune on to the patrons of the store.

Storn is General—The present snowstorm has been pretty general during the past twenty-four hours over the territory covered by the different railroads centering at Ogden. North through Idaho and south as far as Soldiers Summit the snow has been drifting since morning and passenger trains from these directions are delayed to a limited extent.

A big wholesale house, having a sample room of toys to dispose of offered them to Wright's Store at a reduction of twenty per cent from the wholesale prices. This enables them to sell at the regular wholesale price and still make a liberal profit.

partite management of the three roads comprising what is known as the great Harriman system, but these stories are frowned down upon by the more prominent local railroad officials, and, replying to queries from a Standard reporter this morning, Superintendent E. C. Manson of the Salt Lake division of the Southern Pacific said: "Supt. Manson's Statement.

"There is absolutely nothing in these newly resurrected stories of segregation which have been in circulation repeatedly during the past two or three years, and General Manager Hancock has probably been called east on matters connected with merger and freight rate cases now being adjudicated by the courts. That is all the foundation there is for the present sensational rumors, and the Standard can set the matter right with the reading public by a plain statement of the facts in the case.

"We have had an important meeting today of the more prominent operating officials of the Salt Lake division and matters connected with the 'unit' system, now in full force on the division, has been the theme of discussion at the conference. Officials from different points between Ogden and Sparks have been in attendance and will return to their respective duties tonight and tomorrow. Storm Has Not Caused Delay.

"There are no changes of importance to announce and matters are running smoothly all along the line West. The present storm has not delayed traffic to any appreciable extent, and passenger trains on the Southern are arriving nearly on time. The record is excellent in that respect and we apprehended no trouble in the future because of snow or inclement weather."

Reduced Prices and Good Show Draws Large Crowd at the Orpheum

A good show at moderate prices sums up the opening of this week's bill at the Orpheum last night and the people of Ogden certainly showed their appreciation of both in the well filled house and the numerous curtain calls at each act. Every act on the bill this week is a headliner in itself and worthy of praise, there is not a dull moment from the time the orchestra plays the first excellent overture to the drop of the curtain on the melodrama plot.

"THE SERENADE"

The seat sale for the Serenade, which plays at the Orpheum Wednesday evening, December 15th, is as promising large proportions it looks as though the Salt Laker will display the S. R. O. sign. Order your seats early.

Where Gas Is Used

The new department flats have a laundry drying room and the pipes are so arranged that each tenant uses the gas through their meter when doing laundry work. The nice ripe bananas you see hanging in our stores have all been ripened by gas heat while in storage. Automatic soldering furnaces are now used by tinner, and when the tinner removes the iron, the gas is automatically turned down, when he places it in the burner again to be reheated, the gas is turned up, automatically.

Gas is used in the large canning factories for heating and soldering, blacksmiths now use it for heating wagon tires, which is much cheaper and quicker than the old wood pile method of heating the tire.

The gas engine is the cheapest prime mover known. A gas engine using producer gas gives one horsepower hour for one pound of coal. The best compound steam engines use two pounds of coal for every horsepower.

Gas in the home has no superior for comfort in cooking. We are installing gas stoves every week and people are beginning to appreciate the comforts of gas.
